Repost: Make Eclipse ignore .svn directories

by Benny Bottema - Tuesday, August 11, 2009

http://www.bennybottema.com/2009/08/11/repost-make-eclipse-ignore-svn-directories/

Eclipse has the annoying little problem where Eclipse will copy .svn folders to the target/classes output folder and then complain about duplicate resources. After wading through some vague solutions, here's a clear and simple post I found to solve this annoyance.

Make Eclipse ignore .svn directories

> Window -> Preferences…, Java -> Compiler -> Building. Under "Output folder" add ", .svn/" to "Filtered Resources" (so that you get "*.launch, .svn/").

It still works like a charm. Thanks Brian.
